SUMMARY

Full-Stack Developer with 3.5+ years of experience developing and supporting enterprise financial applications using Angular, .NET Core, SQL Server, and Azure. Experienced in delivering end-to-end features across frontend, backend, REST APIs, and databases, translating business requirements into production solutions, investigating defects, and supporting releases. Hands-on experience with AI-assisted development tools and modern engineering POCs.

EXPERIENCE

Nov 2022 - Jul 2026 **Full-Stack Developer - [ZioNet](#)**

Tel Aviv | Outsourced to Poalim-Sahar, a subsidiary of Bank Hapoalim

Technologies: Angular 12-21, TypeScript, RxJS, DevExtreme, .NET Core, C#, Entity Framework Core, SQL Server

Contributed as part of the development team to an internal enterprise financial platform used by Bank Hapoalim clients for securities and investment-management operations.

- Delivered end-to-end features across Angular, .NET Core, and SQL Server based on business requirements and functional specifications.
- Developed and maintained Angular screens using TypeScript, RxJS, and DevExtreme, integrating them with REST APIs.
- Built and maintained backend services, REST APIs, Entity Framework Core data access, database tables, T-SQL queries, and Stored Procedures.
- Implemented and maintained business rules and financial workflows for securities and investment-management processes.
- Investigated bugs and production issues and collaborated with developers, QA, and business teams throughout testing and release preparation.

EDUCATION

Starting Jul 2026

AI Engineering - [DevOps Experts](#)

Upcoming hands-on program covering Python, RAG, LLM integration, MCP, AI Agents, Docker, observability, and production deployment.

Nov 2023 - Apr 2024

Java Backend & Microservices Engineering - [Tsofen-Tashbik](#)

250-hour professional program covering Spring Boot, Microservices, Docker, Kubernetes, SQL/NoSQL, Git, and DevOps. Project: [DisplayingSocialMediaData](#) - Spring Boot microservices deployed with Docker.

Nov 2021 - May 2022

Full-Stack Software Engineering Bootcamp - ZioNet

85-hour program. Built three React Native applications; final project: real-time collaborative shopping list using Azure SignalR, .NET Core, Azure App Service, and Azure SQL. GitHub: [ShoppingList](#).

Oct 2019 - May 2021

Practical Software Engineer - [Ruppin Technological College](#)

Final project grade: 100. [TakeMeToWork](#) - shared-ride scheduling application for shift workers with multi-stop route planning, real-time driver tracking, and barcode boarding confirmation (React Native, C#, SQL Server, Google Maps API).

SKILLS

Backend: C#, .NET Core, Entity Framework Core, SignalR, ASP.NET MVC (academic), Java, Spring Boot

Frontend: Angular, TypeScript, RxJS, DevExtreme, JavaScript, HTML5, CSS3, Bootstrap, React, React Native

Databases: SQL Server, T-SQL, Stored Procedures, Azure SQL, MongoDB, Firebase

Cloud & DevOps: Azure App Service, Azure DevOps, Git, GitHub Actions, CI/CD

Containers & Microservices: Docker, Kubernetes, Microservices (hands-on training and project experience)

APIs & Architecture: REST APIs, OpenAPI/Swagger, Repository Pattern, MVC, OOP

AI & Modern Tools: ChatGPT, Claude, Cursor, GitHub Copilot, Azure OpenAI, RAG, AI Agents, MCP, Python, Playwright (E2E)

LANGUAGES

Arabic: Native | **Hebrew:** Native | **English:** Professional Working Proficiency
