

Ayoub Nasrallah

Full-Stack Developer · Angular & .NET Core

Email: ayobnas@gmail.com | Phone: 050-212-7125  

SUMMARY

Full-Stack Developer with 3.5+ years of experience building and maintaining large-scale securities and capital-markets management systems using Angular, .NET Core, SQL Server, and Azure DevOps. Experienced in delivering end-to-end solutions across database, backend, and frontend layers, implementing complex business workflows, and supporting enterprise applications used by institutional financial organizations. Passionate about modern software development, cloud technologies, and AI-powered development tools.

EXPERIENCE

Full-Stack Developer — [ZioNet](#) (outsourced to Poalim-Sahar)

Nov 2022 – Present

Tel Aviv · Enterprise financial & securities-management platform (Angular + DevExtreme + ASP.NET Core + SQL Server)

Worked on the development and maintenance of a securities and capital-markets management platform serving institutional investors and large financial organizations, including insurance companies and enterprise clients.

- Delivered end-to-end features across SQL Server, ASP.NET Core, and Angular based on business requirements and functional specifications.
- Designed and implemented database changes, backend services, REST APIs, and frontend screens for a platform containing over 400 screens.
- Took ownership of complete feature delivery, from requirements analysis through implementation, testing, and release preparation.
- Participated in requirements and business-process discussions, identifying calculation and workflow inconsistencies before implementation.
- Implemented complex business logic and financial workflows for securities-management operations.
- Built and maintained Angular applications using TypeScript and DevExtreme components.
- Worked extensively with SQL Server, Entity Framework, Stored Procedures, and data-management processes.
- Developed real-time functionality using SignalR.
- Built high-performance Excel export solutions handling 250K+ records with RTL Hebrew support.
- Participated in the development of core platform modules from the early stages of the project and contributed to their long-term maintenance and evolution.
- Served as a key knowledge resource for multiple application modules, supporting production issue investigations, troubleshooting, and feature enhancements.
- Worked closely with QA engineers to validate requirements, investigate issues, and improve release quality.
- Collaborated within a team that started with six developers and later continued with four developers, delivering enhancements and ongoing production support.

EDUCATION & TRAINING

Microservices & Cloud Development — [Tsofen-Tashbik](#)

2024

Professional program covering Microservices architecture, Docker, Kubernetes, Spring Framework, SQL/NoSQL, Git, and DevOps fundamentals - [DisplayingSocialMediaData](#)

Practical High-Tech Engineering — [Zionet & Heznek](#)

2021 – 2022

Built three React Native apps; final app ran in real-time with Azure SignalR, an ASP.NET Core backend, Azure App Service, and Azure SQL. GitHub: [ShoppingList](#)

Practical Software Engineer — [Ruppin Academic Center](#)

2019 – 2021

Final project grade: 100 — [Take Me To Work](#)

SKILLS

Frontend: Angular, TypeScript, RxJS, DevExtreme, Bootstrap, React, React Native, JavaScript, HTML5

Backend: C#, .NET Core, ASP.NET MVC, SignalR, Entity Framework Core, Java, Spring Framework

Databases: SQL Server, Stored Procedures, MongoDB, Firebase

Cloud & DevOps: Azure, Azure DevOps, Docker, Kubernetes, Microservices, Git, GitHub Actions, CI/CD

AI & Modern Tools: ChatGPT, Claude, Cursor, GitHub Copilot, Playwright (E2E)

AI Projects & POCs: RAG, AI Agents, MCP, Azure OpenAI

APIs & Architecture: REST API, OpenAPI/Swagger, Repository Pattern, MVC Architecture, OOP, Python

LANGUAGES

Arabic: Native | Hebrew: Native | English: Professional Working Proficiency
